Travel Management System

Team 39-
Arunsundar Kannan
Ashish Tak
Prajnya Satish

Vision

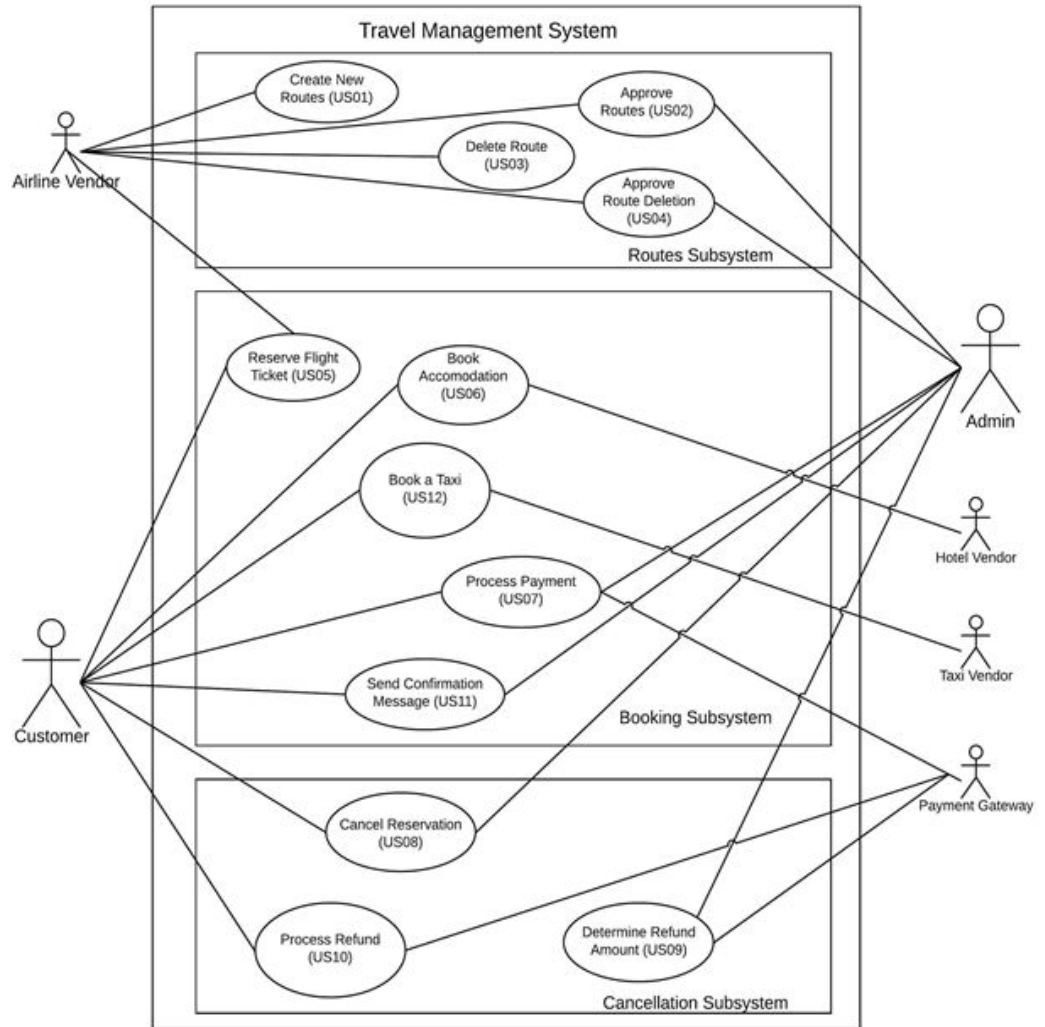

- Build a simple intuitive travel app.
- Manage all aspects of travel on the same platform.

Description

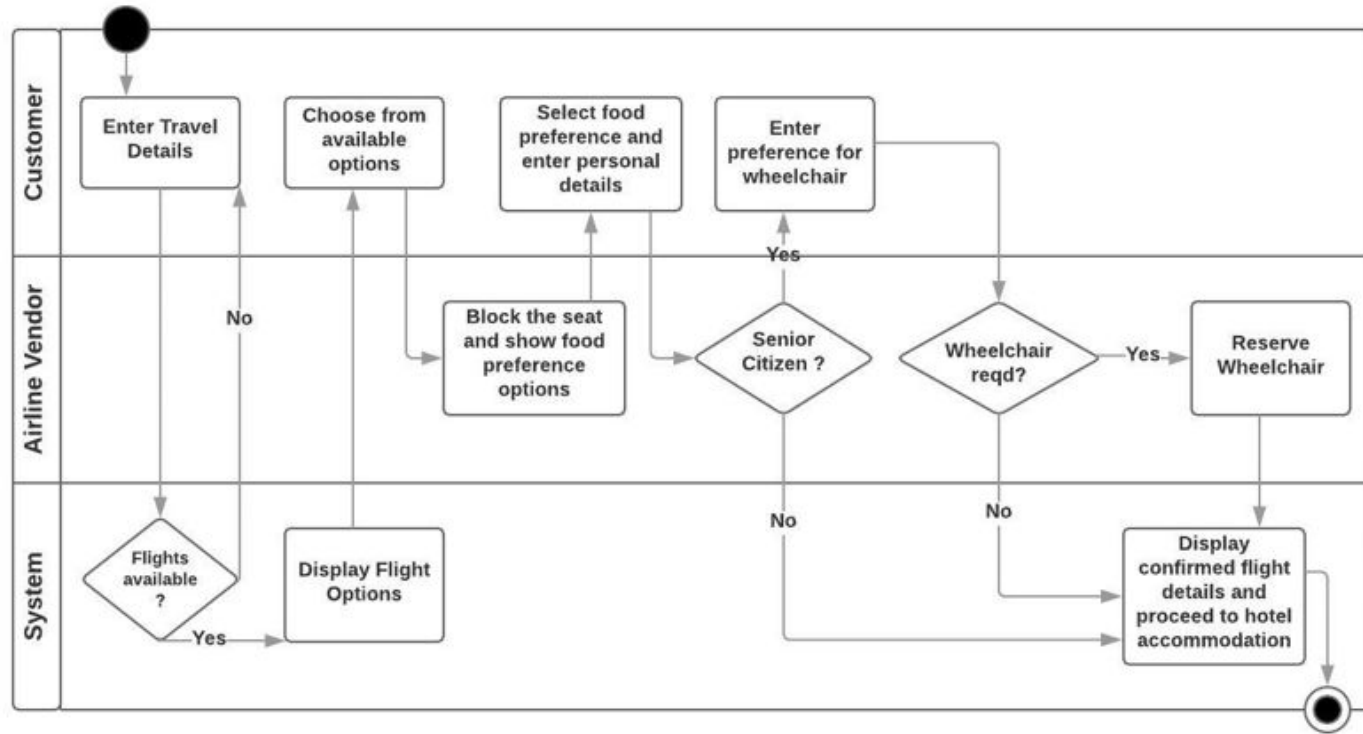

A travel management system to enable a traveller to book flight tickets and manage other aspects of his journey such as food preference, accommodation and commute on the same platform

The Actors

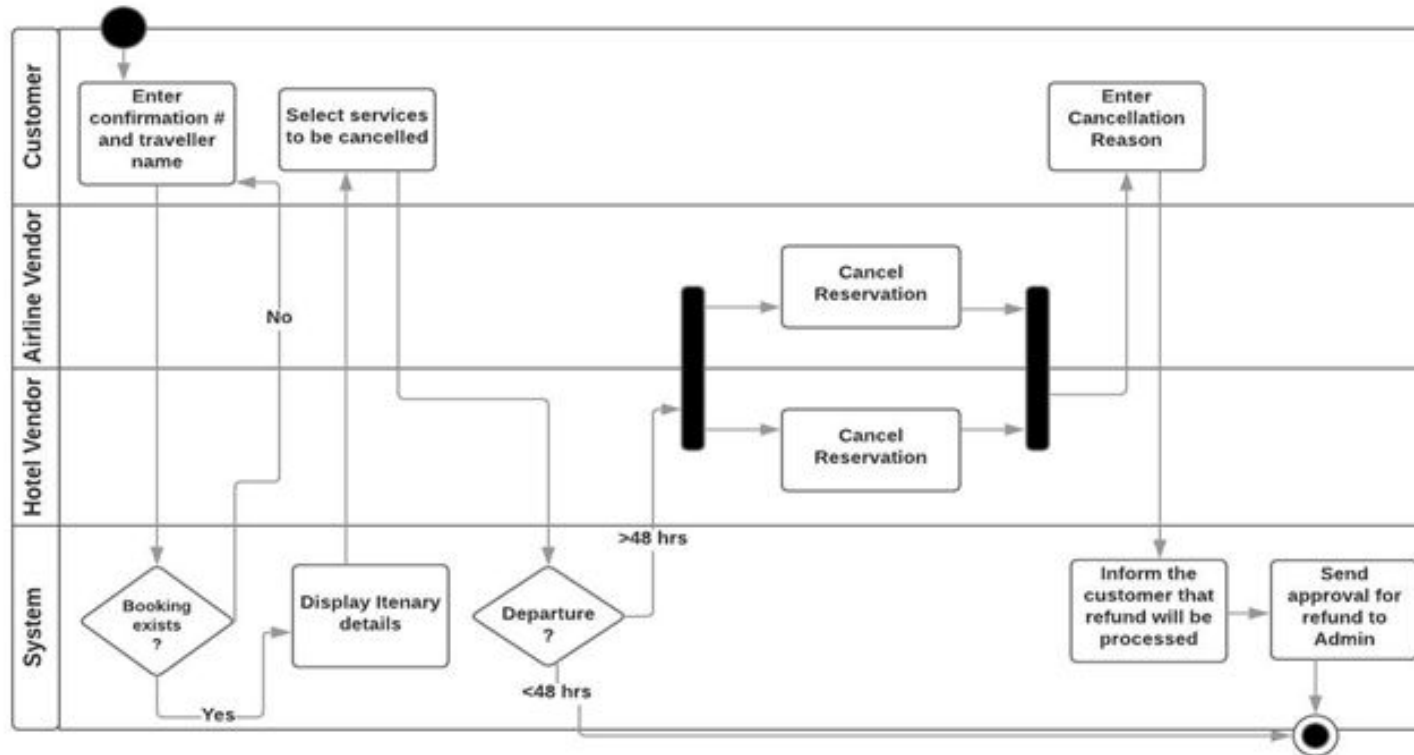

Use Cases

Use Case US05: Reserve Flight Ticket

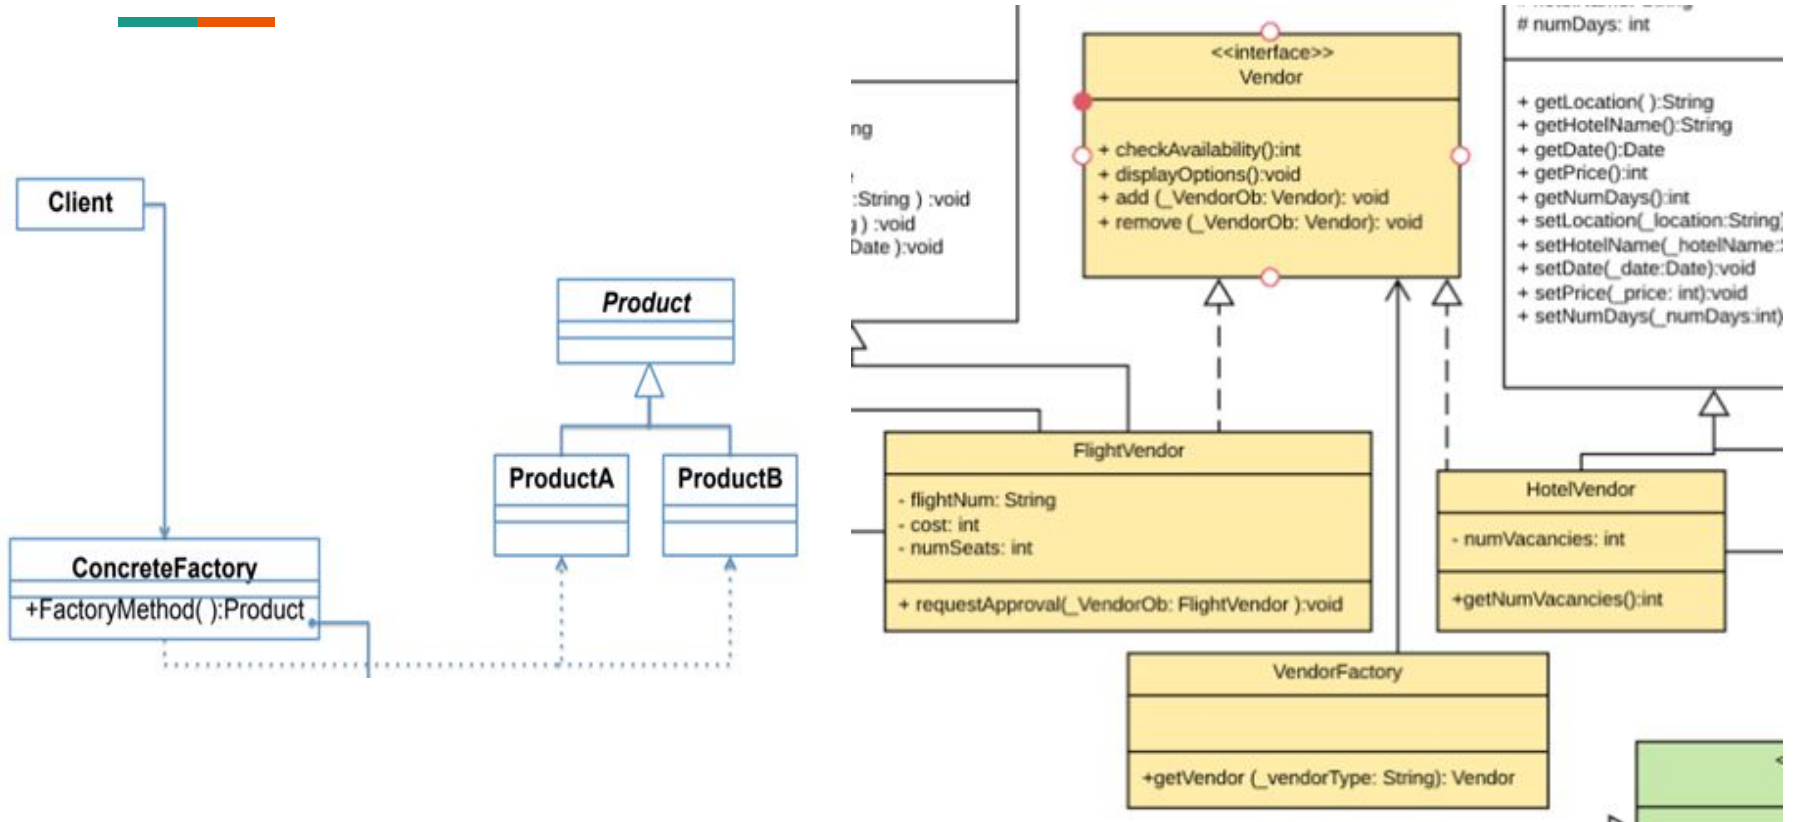

Use Case US08: Cancel a booking

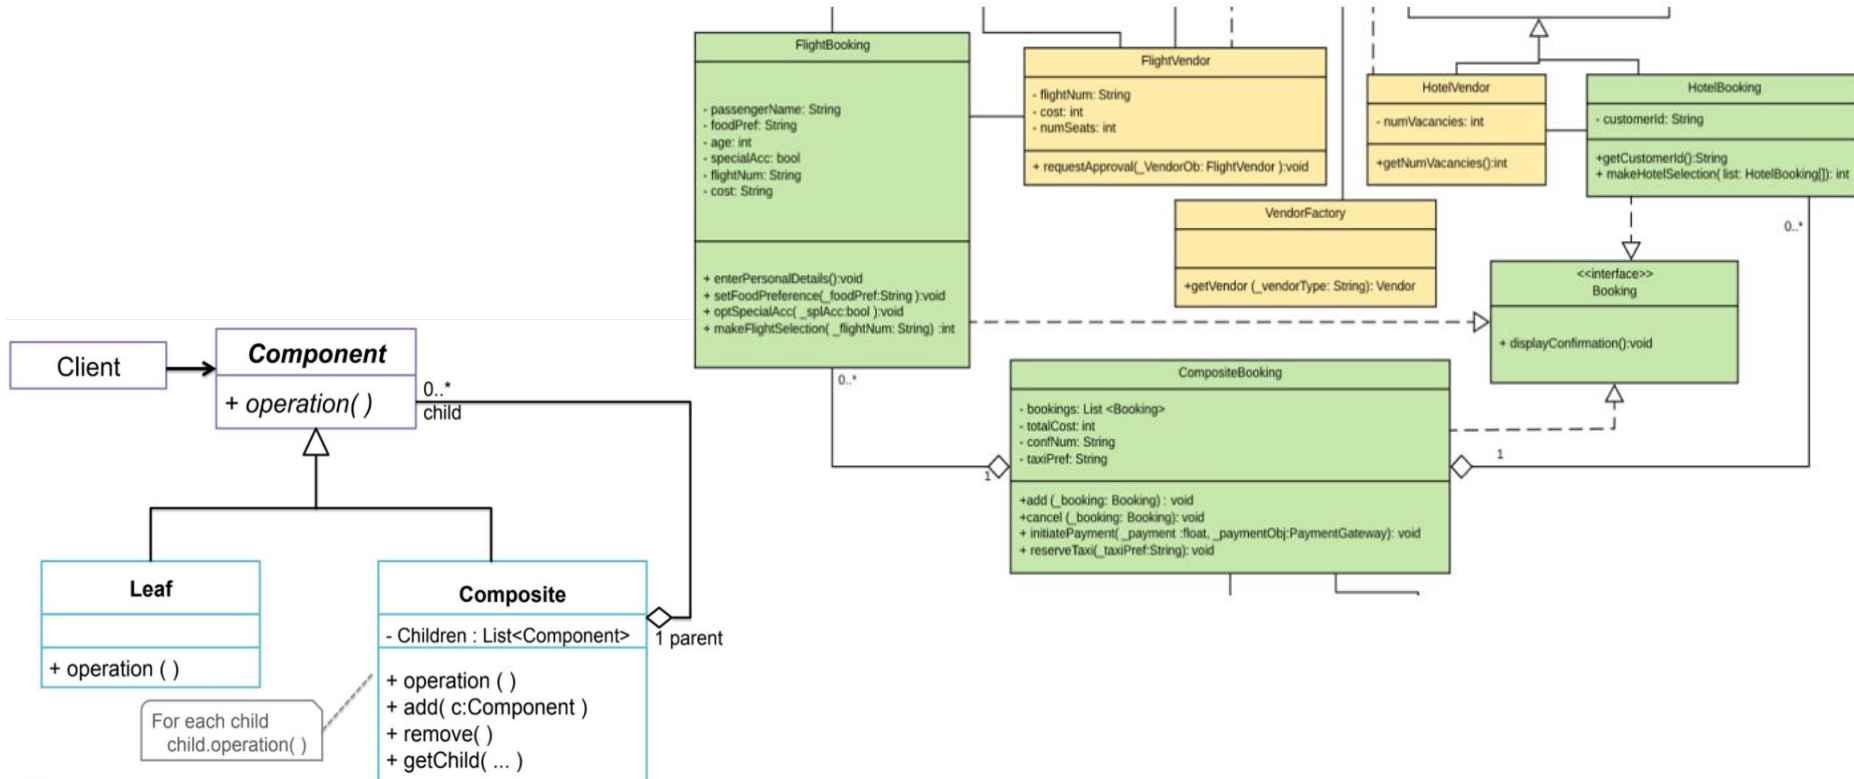

Design Patterns

Factory Design Pattern

Composite Design Pattern

What's new and different?

- The user chooses from a range of services on the same platform. (with the help of composite design pattern)
- Service providers can add or remove their services directly on this platform.
